Incentivize.

Reward.

Corporate Rewards Solution

Recognize. Motivate. Reward.

Paysign Reward Cards are designed to incentivize cardholders, plain and simple. Whether your target audience is internal (employees) or external (consumers), this unique program creates solutions that fit your schedule and can be ready to go in weeks, not months. We also offer solutions that deliver rewards virtually via users' digital devices, which helps generate valuable insights into cardholder behavior.

Pharmaceutical Services

Copay Solutions

These pharmacy-based solutions are processed in a way similar to traditional insurance coverage, utilizing the National Council for Prescription Drug Programs (NCPDP) transmission standard to adjudicate claims following the client's business rules. Paysign's Copay solutions act as a voucher, funding the full cost of the drug, or as a secondary payor, funding all or part of a patient's out-of-pocket responsibility. These highly customizable solutions increase the speed of access to therapy by overcoming patient financial barriers. Each is designed to meet the specific needs of the clients' marketing strategy.

Medical Benefits Solutions

Paysign's Medical Benefits Solutions utilize the same medical billing and payment system used by hospitals, doctor's offices, and healthcare providers. Providers can submit electronic or paper medical claims to help patients afford therapy or related services. These claims have custom business rules and payment rates that will match the needs of the patients. Streamline the process of covering products and services traditionally billed on medical claims by positioning an affordability program with a benefits solution. Nearly all procedures can be covered under a medical benefit solution, including drug administration, lab work, and office visits.

Buy + Bill Solutions

As a debit card processor with more than 15 years of experience, Paysign's Buy + Bill Solutions offer the industry's best variety of programs designed to mitigate the risk associated with traditional, debit-card-based affordability solutions.
