Forward-Looking Statements

This presentation may include forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (“Forward-Looking Statements”). All statements other than statements of historical fact included in this presentation are Forward-Looking Statements. These Forward-Looking Statements are based on our current expectations, assumptions, estimates and projections about our business and our industry. Phrases that use words such as "believe," "anticipate," "expect," "intend," "plan," “propose,” "may," and other similar expressions identify Forward-Looking statements. In the normal course of our business, we, in an effort to help keep our shareholders and the public informed about our operations, may from time-to-time issue certain statements, either in writing or orally, that contain, or may contain, Forward-Looking Statements. Although we believe that the expectations reflected in such Forward-Looking Statements are reasonable, we can give no assurance that such expectations will prove to have been correct. In addition, any statements or comments that refer to expectations, projections, estimates, forecasts, or other characterizations of future events or circumstances are Forward-Looking Statements. These Forward-Looking Statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those reflected in the Forward-Looking Statements. Such factors include, among others, the inability to continue our current growth rate in future periods; that a downturn in the economy, including as a result of COVID-19 and variants, as well as further government stimulus measures, could reduce our customer base and demand for our products and services, which could have an adverse effect on our business, financial condition, profitability and cash flows; operating in a highly regulated environment; failure by us or business partners to comply with applicable laws and regulations; changes in the laws, regulations, credit card association rules or other industry standards affecting our business; that a data security breach could expose us to liability and protracted and costly litigation; and other risk factors set forth in our Form 10-K for the year ended December 31, 2024. Except to the extent required by federal securities laws, the company undertakes no obligation to publicly update or revise any statements in this presentation, whether as a result of new information, future events or otherwise.

Important Notices

Management’s Use of Non-GAAP Financial Information

To supplement Paysign’s financial results presented on a GAAP basis, we use non-GAAP measures that exclude from net income the following cash and non-cash items: interest, taxes, depreciation and amortization and stock-based compensation. We believe these non-GAAP measures used by management to gauge the operating performance of the business help investors better evaluate our past financial performance and potential future results. Non-GAAP measures should not be considered in isolation or as a substitute for comparable GAAP accounting, and investors should read them in conjunction with the company’s financial statements prepared in accordance with GAAP. The non-GAAP measures we use may be different from, and not directly comparable to, similarly titled measures used by other companies. “EBITDA” is defined as earnings before interest, taxes, depreciation and amortization expense. “Adjusted EBITDA” reflects the adjustment to EBITDA to exclude stock-based compensation charges. EBITDA and Adjusted EBITDA are not intended to represent cash flows from operations, operating income or net income as defined by U.S. GAAP as indicators of operating performances. Management cautions that amounts presented in accordance with Paysign’s definition of Adjusted EBITDA may not be comparable to similar measures disclosed by other companies because not all companies calculate Adjusted EBITDA in the same manner.

Putting Payments Into Motion

Paysign is a leading provider of integrated prepaid card programs and payment processing with advanced consumer engagement tools for customized, scalable solutions tailored to each client's goals. Our innovative payment solutions are designed to support businesses across all industries, with special emphasis on the healthcare industry.

Through our end-to-end technology platforms, we provide the secure digital payouts and processing solutions that enable billions of exchanges of value each year.

Paysign is committed to technology advancements that lower administrative costs, streamline operations, and drive revenue for our customers.

NASDAQ: PAYS

Company Overview

Paysign was incorporated in 1995 and is headquartered in southern Nevada.

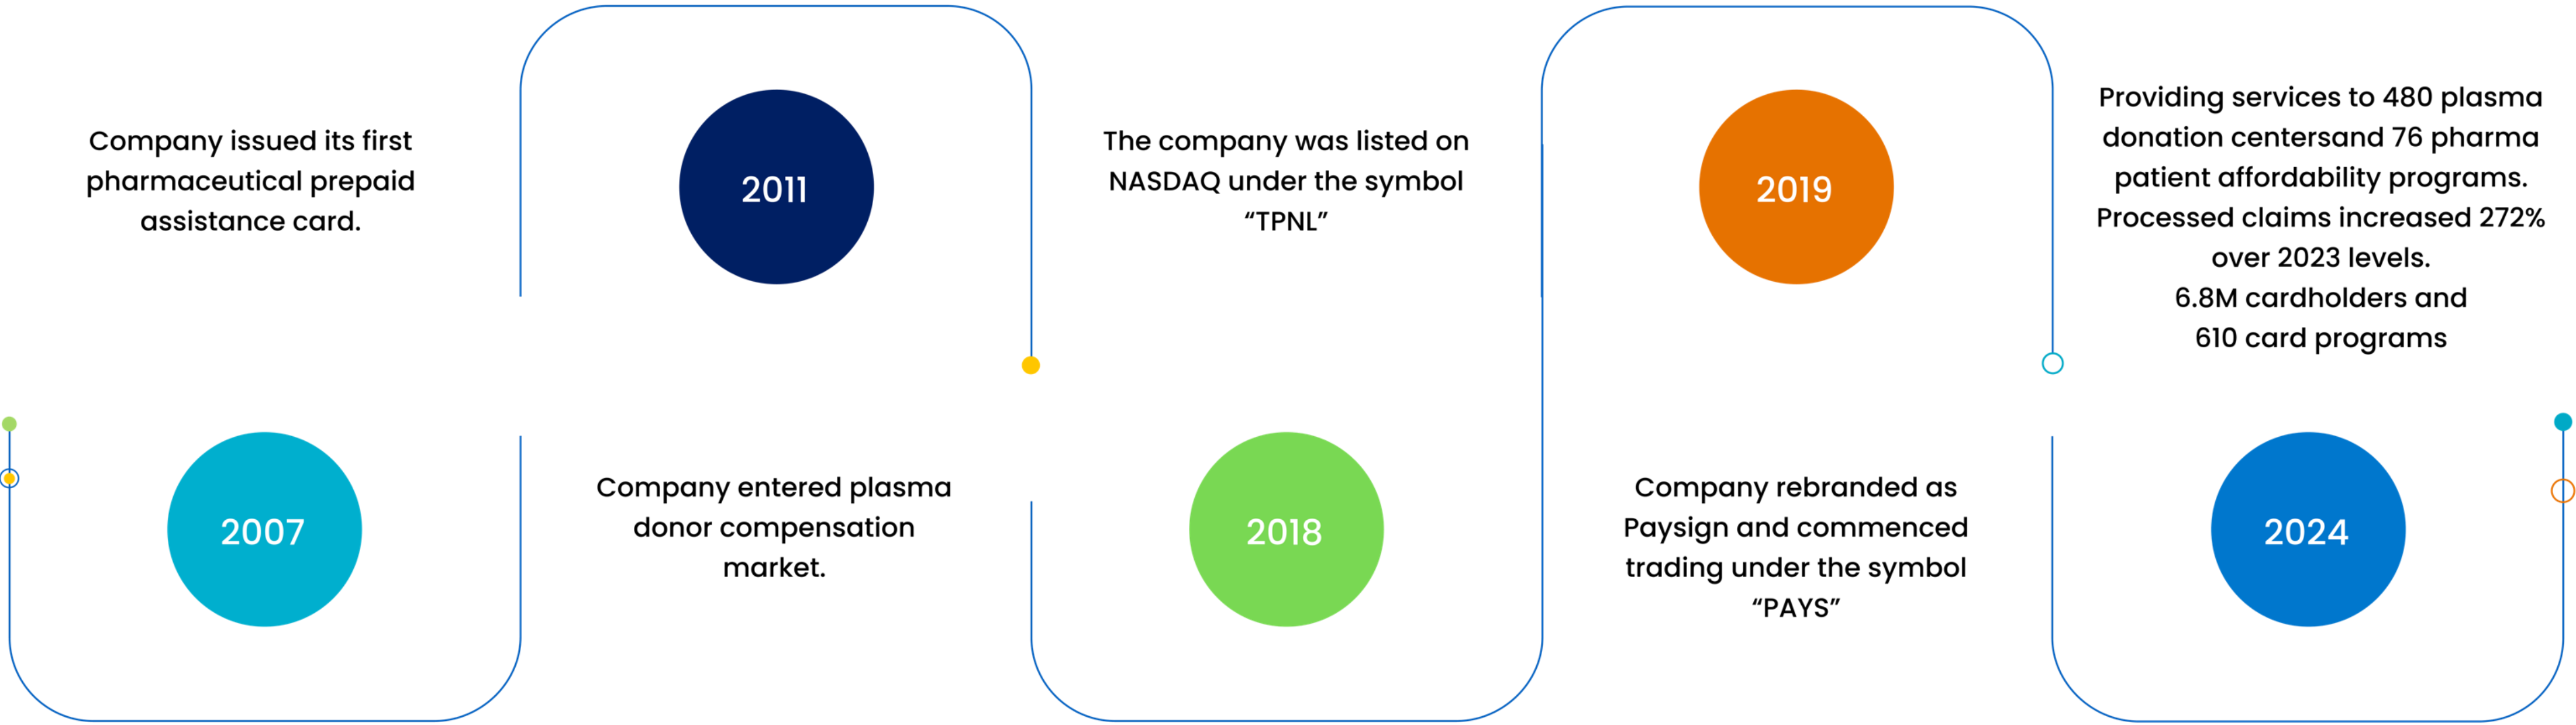

For more than 20 years, Paysign has been a trusted partner for major pharmaceutical and healthcare companies, as well as multinational corporations, delivering fully managed programs built to meet their individual business goals.

Through our direct connections for processing and program management, the company navigates all aspects of the prepaid card lifecycle completely in house – from concept and program design to inventory, fulfillment, and launch.

Company Milestones

Investment Highlights

Financials

Strong cashflow, margin expansion, and zero debt

Revenue Growth

Fast growing, high-margin, profitable business with predictable recurring revenues

Technology

Leading proprietary cloud-based payments platform

Products and Solutions

Large market opportunity in B2B and B2C prepaid solutions with high barriers to entry

Leadership

Highly accomplished and experienced management team and board

Service and Delivery

Superior client retention and quality of service, including in-house contact center

Patient Affordability Solutions

Powering the Convergence of Fintech and Healthcare

Pharmacy Benefit Copay Solutions: This includes the standard copay and voucher programs in the Pharmacy industry, which process claims using the the National Council for Prescription Drug Programs (NCPDP) transmission standard.

Medical Benefit Copay Solutions: These programs utilize the same medical billing and payment system as hospitals and healthcare providers to deliver the fastest claims payments in the industry, arriving in days instead of months.

Copay Maximizer Mitigation and Alternative Solutions: Paysign has developed proprietary technology to identify and mitigate the effects of copay maximizers by applying Dynamic Business Rules to bring cost savings to our pharmaceutical clients. In addition to our maximizer mitigation technology, we have additional products and resources that reduce the impact of other programs, such as copay accumulators.

Annual Pharma Revenue

Plasma Donor Solutions

Powering the Convergence of Fintech and Healthcare

Paysign offers donor compensation programs that give our clients the tools they need to streamline their operations while increasing donor retention.

Since entering the plasma donor compensation market in 2011, Paysign has become a market share leader with approximately 40% of the market as of year end 2024.

The plasma market is currently experiencing an oversupply of source plasma, which is expected to abate in 2026.

Leveraging newly acquired donor engagement and management software to create a front-end ecosystem: increase donor retention; reduce high expense of acquiring new donors; streamline operations and add efficiencies; more cost-effective management of donors.

Recent Developments

Acquisition of Gamma Innovation

On March 25, 2025, Paysign announced that it acquired the assets of Gamma Innovation LLC (Gamma), significantly enhancing Paysign’s capabilities in plasma donor and pharmaceutical patient engagement technologies. Among the key assets acquired by Paysign were:

A donor engagement app, designed to reduce the cost-per-liter – primarily driven by labor costs and donor fees – while improving donor retention. The app integrates seamlessly with existing donor management systems, delivering immediate value to plasma centers without complex implementations.

A specialized customer resource management (CRM) platform tailored specifically for the blood and plasma collection industry, replacing traditional one-size-fits-all CRMs, reducing unnecessary expenses, and improving donor engagement, marketing effectiveness, and retention through customizable journey automation tailored to business-defined audiences.

Additional innovative donor management solutions targeted to the blood and plasma collection industry’s donor engagement/management ecosystem designed to reduce operating costs, optimize donor compensation through intelligent payments and enhance efficiency throughout the donation process.

Leveraging our position in the plasma collection space, there has been strong initial plasma industry reception to the new products. The acquisition supports our long-term growth strategy to expand revenue and market share opportunities within the plasma market. It also creates a foundation to expand our pharma patient affordability revenue opportunities by including patient engagement and adherence solutions. Demonstrations of the app and CRM for clients are scheduled at the International Plasma Protein Congress, May 20-21, 2025.

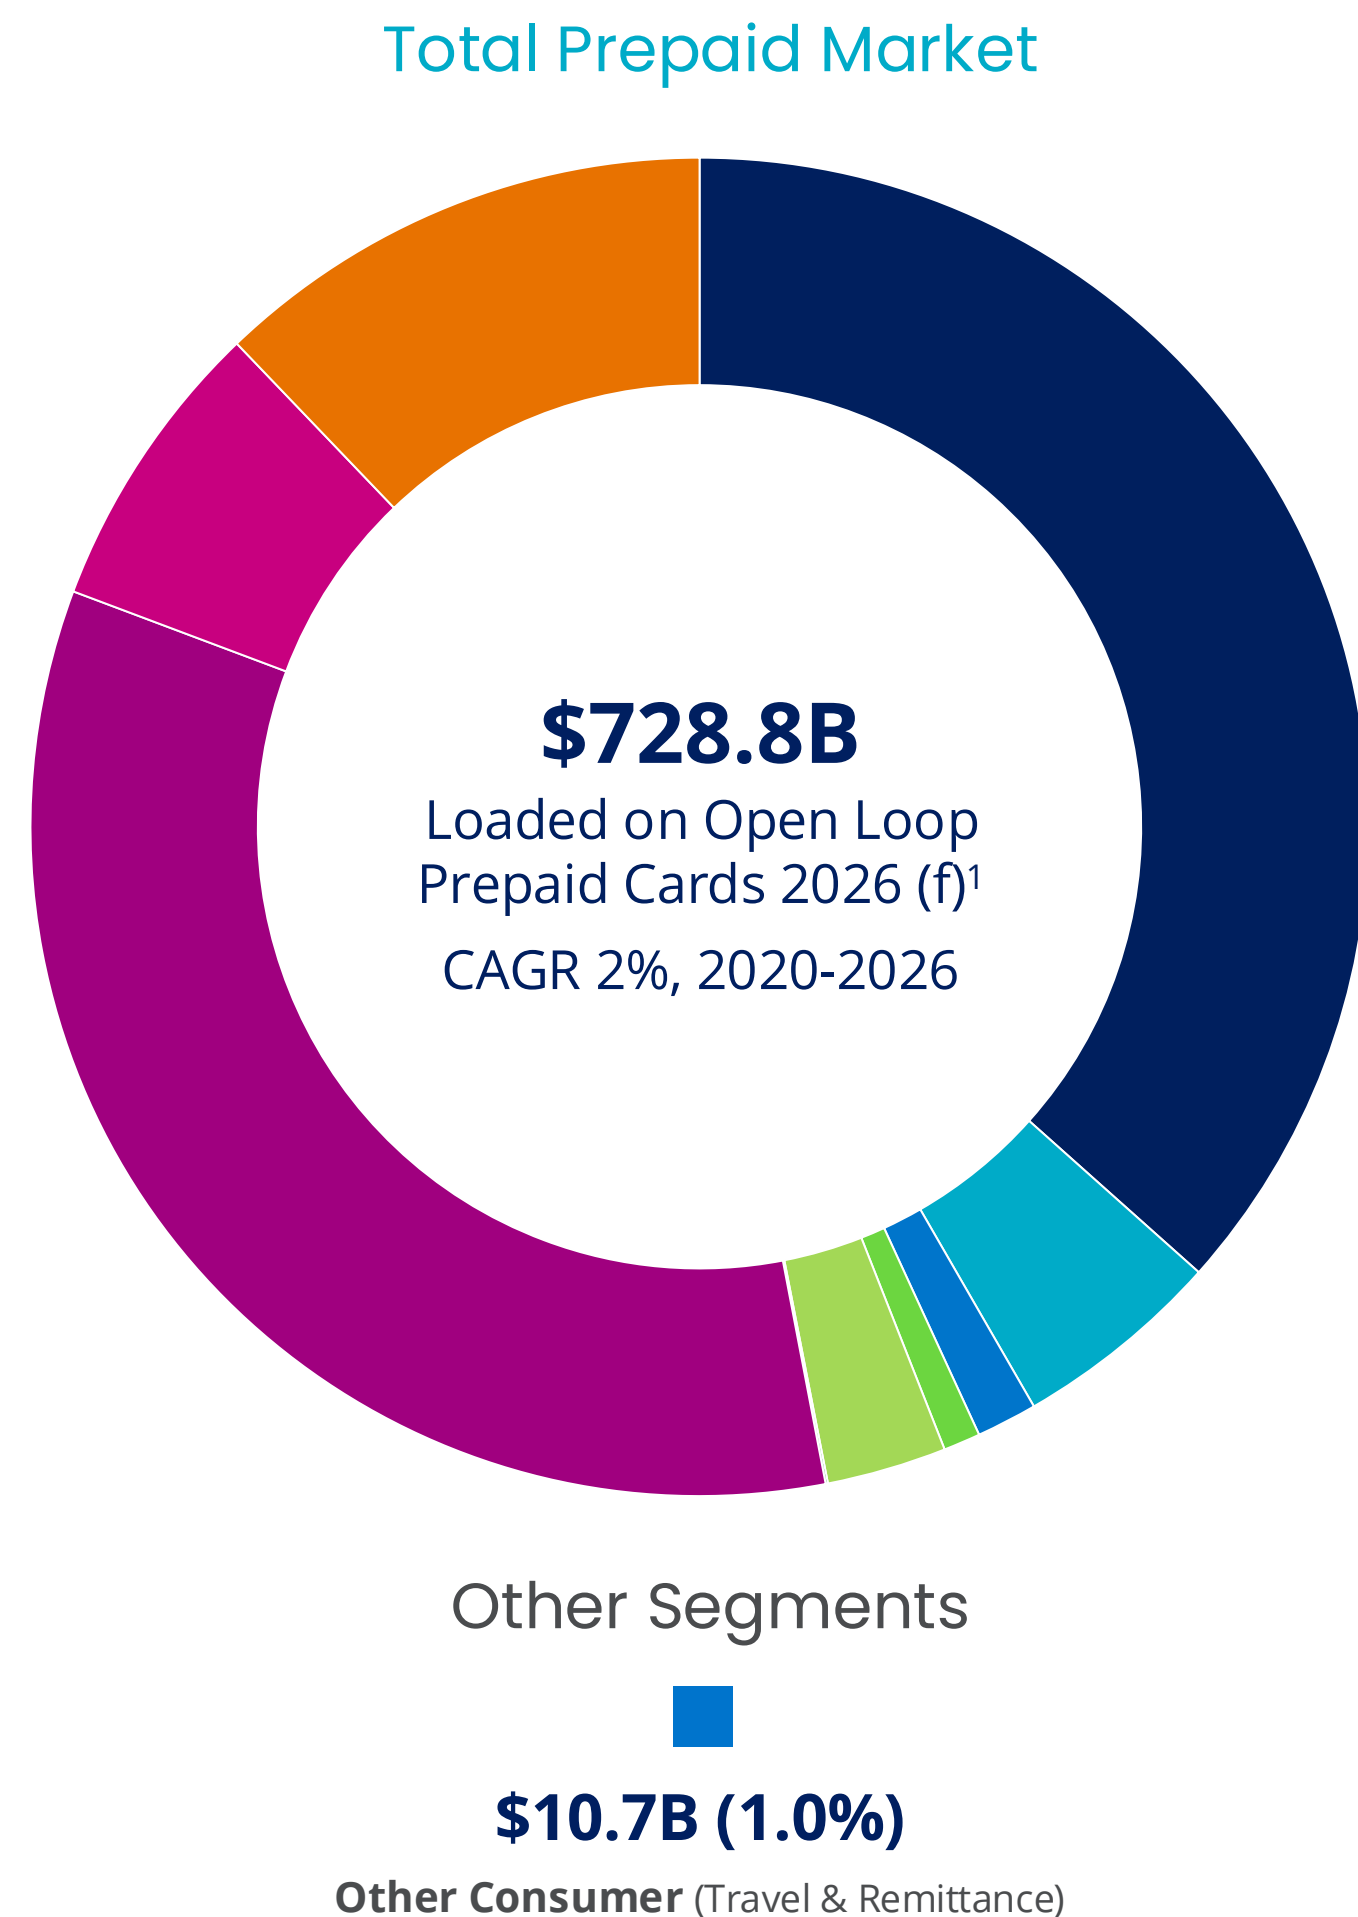

New Markets Overview

Additional Market Niches Leverage Paysign Solutions

Paysign consistently builds and launches beta programs into niche markets to refine payments infrastructure, collect data, and analyze performance. Other growth strategies into additional markets include integrations, partnerships, and acquisitions.
